Subject: Herbicide Drift NCIPM group: meeting summary and next steps
To:

Happy Friday! It's been a week since our regional herbicide drift meeting. Thanks to those who attended, we had excellent discussion to help move this group's work along. Meeting notes are attached. I will add these notes to our website next Friday along with any additions or corrections I receive between now and then. You can also [watch the meeting recording](#). (available for the next 270 days).

Follow-up steps:

- **Survey Tool Design Team:** Several volunteers came forward during or after the meeting and I will follow up with others who indicated an interest on their meeting registration. I hope to gather this group around a first draft in the next two weeks, and share a revised draft with the whole group in November.
- **Herbicide Drift Research Group:** Several attendees expressed interest in collaborating, sharing, and promoting the need for research on specialty crop herbicide drift issues. We'll be investigating some additional resources and ideas for this group, so stay tuned and feel free to share ideas.
- **Promote the survey:** As we move forward, let me know what materials would help you promote the survey in your state networks. Thanks to those who have already shared ideas or a willingness to help in this way.
- **Ideas for additional grant funds:** Please be on the lookout for state, regional, or commodity group funding opportunities that might help us do more with this survey or group.

Thanks!
